

## How to Calculate Your GPA

To compute your GPA, multiply the number of credits by the grade point value for each course. Then add the grade points and divide by the total number of credits.

### GPA Calculation

$$\frac{\text{Total GPA Points}}{\text{Total Credits}} = \text{GPA}$$

An Example:

Course & Number	Grade	=	Point Value	x	Credits	=	GPA Points
ENGL 111	B	=	3.00	x	4	=	12.00
THEO 101	B-	=	2.67	x	4	=	10.68
MATH 101	C	=	2.00	x	4	=	8.00
SOC 100	A-	=	3.67	x	4	=	14.68
<b>TOTAL</b>					<b>16</b>	=	<b>45.36</b>

$$45.36 \text{ (Total GPA points)} / 16 \text{ (total credits)} = 2.853 \text{ (GPA)}$$

By using this information you can calculate a grade estimate for yourself. The grid below will help you figure out point values for each of the grades.
