About this Survey

The Post Graduation Survey of Undergraduate Alumni is assembled annually by the Career Development Center in an effort to provide accurate and useful information to students, faculty, staff and administration about the post-graduation activities of undergraduate alumni from the University of St. Thomas. We hope this information will be used to advise current and future students.

The information in this report covers alumni who graduated from an undergraduate program during the 2007-2008 academic year (December 2007, May 2008 and July 2008). The University's Office of Institutional Research and Analysis provided assistance for the survey that was sent out to 1,149 alumni November 2008 through February 2009. Of these, 563 (49%) responded to the survey.

171 graduates responding to the survey completed coursework for two or more majors. Those graduates have been included under each of their academic majors. These circumstances account for the total of 740 responses when individual majors are reported.

This survey, as well as previous survey results may be found on the Career Development Center's Web site at www.stthomas.edu/careerdevelopment/pgs.

If you have any questions pertaining to the survey, or if you would like to request additional copies of this report, you may contact:

Median salaries are reported by department instead of major to provide increased statistical significance. To protect confidentiality, departments with less than three salary responses cannot be reported alone, therefore we made the following modifications to the method for salary calculations: For Mathematics and Theology we included last year's data to come up with more than three responses. The School of Education had multiple single graduates from individual fields of study, as these are all similar in range they were grouped together. Since there were only two responses from Geology majors this year, with no responses from last year, Geology is the only department without a median salary listed.
