

We're Seeking Great Teachers in Engineering

Due to tremendous growth in the School of Engineering, the University of St. Thomas anticipates one or more tenure track faculty positions in our Mechanical and Electrical Engineering programs with a starting date for the fall 2010 semester.

This is a great opportunity for dynamic professionals who value teaching and are committed to developing an outstanding Engineering program in the context of a Liberal Arts university.

In addition to excellence in teaching, the faculty must also develop research programs where students are engaged in the experience. Our industrial partners in the Twin Cities region provide a vibrant platform for projects in a broad range of high-tech & manufacturing fields.

Established in 1885, the University of St. Thomas is located in the major metropolitan area of Minneapolis-St. Paul, and is Minnesota's largest private university. Its 11,000 students pursue degrees in a wide range of liberal arts, professional, and graduate programs.

Inspired by Catholic intellectual tradition, the University of St. Thomas educates students to be morally responsible leaders who think critically, act wisely, and work skillfully to advance the common good, and seeks to develop individuals who combine career competency with cultural awareness and intellectual curiosity. Successful candidates will possess a commitment to the ideals of this mission.

The University of St. Thomas has a strong commitment to the principles of diversity and inclusion. In that spirit, the University welcomes nominations and applications from a broad and diverse applicant pool.

Look for the official announcement soon at <http://jobs.stthomas.edu>

**According to Money Magazine's *Best Places to Live 2008*,
7 of the top 50 communities are in the Minneapolis-St. Paul metro area.**
