1. Click Start

2. Click Control Panel

3. Click Windows Update

4. Click Check for Updates
It when then connect to windows to see if there are any updates that need to be run.

5. If there are any important updates they will be listed on that page. Optional updates will be listed at a different link below the list of important updates. You will also be able to select which specific updates you want for your computer.

Turning on Automatic Updates

1. On the left hand column of the Windows Update page select **Change Settings**
2. From the drop down menu, select the first option “Install updates automatically (recommended)”

3. Click OK
