

## ADDING TOMMIE LINK TO YOUR MOBILE HOME SCREEN

### Apple Mobile Devices (iPhone, iPod, iPad)

To add Tommie Link to your Apple mobile device homescreen follow these steps:

1. Open Safari. NOTE: Other browsers, such as Chrome, won't work for this.
2. Type "<https://stthomas.campuslabs.com/engage/>" in the search bar or navigate to Tommie Link through the browser.
3. Tap the **Share** button at the bottom of the page.
4. On the bottom row of icons, scroll over until you see **Add to Home Screen** and tap this.
5. On the next screen, choose a name for the link on your home screen. You'll see the link so you can confirm it, as well as the site's icon that becomes its "app" icon on your mobile device.
6. Now just tap the new app on your home screen, and it will open the website in its own navigation window, independent of Safari.

# Android Mobile Devices

To add Tommie Link to your Android mobile device homescreen follow these steps:

1. Open a web browser
2. Type "<https://stthomas.campuslabs.com/engage/>" in the search bar or navigate to Tommie Link through the browser.
3. Tap the menu button and tap Add to homescreen. You'll be able to enter a name for the shortcut and then the web browser will add it to your home screen.
4. The icon will appear on your home screen like any other app shortcut or widget, so you can drag it around and put it wherever you like.
5. Chrome for Android loads the website as a "web app" when you tap the icon, so it will get its own entry in the app switcher and won't have any browser interface getting in the way.
