

STORMWATER BEST MANAGEMENT PRACTICES CURRICULUM UNITS

COURSE INSTRUCTORS
(Summer 2017)

PROJECT LEAD

Deb Besser & Debbie Monson, Engineering
in the P-12 Classroom (TEGR 528)

Michaela Neu, Youth and Community
Outreach Specialist, MWWMO

OBJECTIVES

- The MWWMO would like to provide a set of curriculum units to K-12 educators to increase student and public engagement with stormwater best management practices (BMPs) that have been installed at schools or other locations within MWWMO's boundaries.
- Stormwater BMPs infiltrate rainwater into the ground, preventing runoff of pollutants from entering our lakes, rivers, and streams.
- Students will expand upon a previous SCP project to further develop engineering design curriculum units that K-12 educators can use in their classes to facilitate place-based education.
