

Task Force Summer Report 2015 Integrated & Expanded Health and Wellness Programs

How often and for how long did your group meet over the summer? Was this adequate for the work you needed to do?

Our subcommittee met for two 4-hour meetings.

Yes. We also completed a great deal of work as individuals and communicated via email.

How much work were individual task force members responsible for between meetings?

Seven out of eight members are faculty. Individual faculty chose how much summer work they could commit to over the summer. So the work varied. Committee members interviewed community stakeholders in health care and higher education.

What did/will the group accomplish this summer?

- The group collected interviews from over 20 community experts. We completed a report on Employment and Educational Outlook and a report on Health Education programs at benchmark and aspirational schools.
- We planned a "UST Summit Ideas Festival" for the fall during which community experts will participate in a roundtable discussion of the future of health care and health education.

What are your goals for Fall 2015?

- Hold the "Summit Ideas Festival" and use feedback from this event to structure questions, ideas, and goals for the UST community to respond to.
- Hold brown bags with the UST community to get thoughts and feedback on the future of Health Education at UST
- Develop draft proposal(s) for Integrated and Expanded Health and Wellness at UST.

What are your goals for Spring 2016?

- Continue discussion with the UST and broader community around the draft proposals
- Modify proposals based on feedback
- Make recommendations to administration

Are there any resources your group feels you need to continue efficiently with your work?

Not at this time

Do you plan on any meetings or Brown Bags with the UST community this Fall and/or academic year?

Yes. See above.

What other task force(s) do you feel it is important that you collaborate with going forward?

Community Engagement and Catholic Identity; Diversity; Flexible Pathways, Enhanced Visibility & Profile.
