

Global Connections Task Force

Summary of Task Force Progress

Our task-force met once on Dec. 10th, and then twice in January—on the 6th and 20th.

- The primary focus of these meetings was on identifying features of our current UST governing structures impacting global engagement. We have synthesized a range of issues/questions that arise from these current governing structures, based on a careful examination of the initiatives outlined in the 2014 Report of the Globalization Subcommittee. Our task-force is in the process of identifying possible governance configurations to more effectively manage campus globalization as outlined in the strategic plan. An example of one global engagement initiative is shown below.
- We have also compiled existing policy documents governing globalization. These documents will be reviewed, and a series of recommendations will be forwarded as appropriate.
